

JUNG PUMPEN SKS-B 800

POLY-SUMP

FOR SUBMERSIBLE DRAINAGE PUMPS

APPLICATION

The buoyancy proof sumps are supplied for the house and estate drainage. They can be equipped with one or two pumps.

The sumps are suitable for accessible areas (class A 15) or for traffic areas (class B 125).

Preformed transport handles provide easy transport and placing into its final position.

Waste water and drainage water can vary widely. Therefore we have a range of different pumps to suit the various grades of impurities.

SKS-B 800

DESCRIPTION

Buoyancy-proof plastic sump of high grade polyethylene approved by the German Institute for Construction Engineering (DIBt), with socket for inlet and venting, prefabricated discharge connection and ball valve.

For a comfortable installation of the pumps and for an easy pump removal the sump is equipped with an guide rail system. Depending on the sump version the proven guide rail system GR 23 or GR 50 can be used.

Depending on the used extension it is possible to extend the sump to a total height of 2.75 metres. The required type of loading class depends on the site.

The installation depth with a concrete ring cl. A 15 is 1.70 m. The total volume is 740 litres. The storage volume up to the lower edge of the inlet is 190 litres and the residual volume is 90 litres.

- Mark of conformity
- Single- and double units suitable for traffic to class B 125
- Smooth benched deposit free collection chamber
- Valves can be operated from above
- Easy to install
- Single unit retrofittable as duplex unit

JUNG PUMPEN SKS-B 800

POLY-SUMP

FOR SUBMERSIBLE DRAINAGE PUMPS

SCOPE OF SUPPLY

SKS-B 800 (single unit)

Plastic sump, assembled with guide rail system DN 32 or DN 50, PP-pipe, vertically closing swing-type check valve, ball valve, stainless steel delivery piping with 1¼" or 2" external thread, 1 sleeve DN 150 (KG-pipe) for the inlet, 3 ports for connecting DN 70/DN 100 for cable and venting (KG-pipe).

SKS-B 800 (duplex unit)

Plastic sump, assembled with 2 guide rail systems DN 32 or DN 50, PP-pipe, 2 vertically closing swing-type check valves, ball valve, stainless steel delivery piping with 1¼" or 2" external thread, 1 sleeve DN 150 (KG-pipe) for the inlet, 3 ports for connecting DN 70/DN 100 for cable and venting (KG-pipe).
