

U6

DRAINAGE PUMPS

- Cooling jacket for motor housing
- Flushing device
- Low level pumping by detachable strainer base
- SiC mechanical seal independent of sense of rotation
- Safe to run dry
- 10/20 mm free passage with EIP technology
- Replaceable moisture sealed cable inlet
- For saline solutions up to 15% salinity

DESCRIPTION

The U6 range of pumps is suitable for stationary and portable use. It can be used as a drainage pump for mildly contaminated waste and ground water, in sumps with rain water, drainage or seepage water, silage liquor and liquid manure and brine from water softeners. The high quality mechanical seal also makes the pump suitable for extracting abrasive media.

In stationary use the U6K ES/DS removes the waste water from domestic appliances such as dishwashers and washing machines (also high temperature). Guide rail systems offer the advantages of quick and easy maintenance. The Easyfix installation sets are particularly convenient. They are pre-assembled ready to plug in and can be installed as single or duplex systems. Our ready-to-install collecting tanks extend the options for installation and use.

For supporting sewage water with heavy pollution we recommend our US series. Especially for the transportable use, in building site areas for example, our building pumps MultiDrain UV should be used.

If centrifugal submersible pumps are used outdoors, only a pump with 10 m cable without extension cable may be used in accordance with VDE Regulation 0100.

PERFORMANCE

Type	Delivery head H [m]	1	2	3	4	5	6	7	8	9
U6K E/D/ES/DS	Flow rate Q [m^3/h]	15.5	14.5	13.0	11.5	9.5	8.0	6.0	4.0	1.5

Specifications can be changed without notice. Performance subject to ISO 9906 tolerances.

The minimum flow velocity in the pressure piping must be 0.7 m/s according to EN 12056. This data is represented in the performance curve as a limit of application.

U6

DRAINAGE PUMPS

SCOPE OF SUPPLY

Pump ready for connection acc. to EN 12050 with 90°, 1¼" female connection elbow, cable and plug, S model with automatic level float switch.

The pump is delivered with attached strainer base, which can be exchanged for the enclosed feet if 20 mm free passage is required.

MECHANICAL DATA

Pump	Vertical single-stage	Run dry protection	Yes
Free passage	20 mm	Shaft	Stainless steel
Bearing	Ball bearings, grease-lubricated	Impeller	Vortex impeller, GFK
Seal on motor side	Rotary shaft seal	Motor housing	Stainless steel
Oil chamber	Yes	Submersible	Yes
Seal on medium side	SiC mechanical seal	Pressure outlet	1 1/4"

ELECTRICAL DATA

Motor rating P1	0.75 kW	Winding thermostat	Yes
Type of enclosure	IP 68	Motor protection	Integrated
Insulation class	B

Example of duplex pump installation

Example of installation and dimensions Easyfix 32 Single

Example of installation and dimensions Easyfix 32 Duo

Single unit with GR: sump area min. 40x50 cm or Ø 50 cm
 Single unit without GR: sump area min. 40x40 cm or Ø 40 cm
 Duplex unit with GR: sump area min. 50x55 cm, Ø 65 cm
 Duplex unit without GR: sump area min. 50x50, Ø 55 cm
 Single unit Easyfix 32 Single: sump min. 30x45 cm, Ø 45 cm
 Duplex unit Easyfix 32 Duo: sump min. 50x40 cm, Ø 60 cm
 Duplex unit Easyfix 32 Duo with special float: sump min. 50x50 cm Ø 70 cm

In case of installation beneath the backpressure level the pressure tube must be taken in a loop over the local backup level acc. to EN 12056. Besides, it must be secured with an EN 12050-4-proofed swing-type check valve. Additionally we recommend an alarm system.
 In accordance with EN 12056-4 section 5.1, it has a built-in automatic spare pump or a double attachment included, which ensures that sewage drainage is not interrupted.
